

ANNUAL REPORT
OF THE
REFORMATORY SCHOOL
AT
YERROWDA
FOR THE
YEAR 1895.

Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.
1896.

Digitized with financial assistance from the
Government of Maharashtra
on 11 July, 2017

FROM

THE INSPECTOR-GENERAL OF PRISONS,
Bombay Presidency ;

To

THE SECRETARY TO GOVERNMENT,
Judicial Department, Bombay.

Bombay, 12th May 1896.

SIR,

I have the honour to submit the Annual Report, together with the usual tabular statements, of the Superintendent of the Reformatory School, Yerrowda, which only reached my hands on the 8th instant. Some of the tabular statements which appear at the end of the report differ from those of previous years, their revision having been sanctioned in Government Resolution, Judicial Department, No. 7934, dated 13th November 1895. The delay in the receipt of the report from the Superintendent has been explained by that officer—in a separate communication—as being due to the fact that the one clerk of the Reformatory was ill during the months of January and February last, the consequence being that for nearly two months the Superintendent was without clerical assistance. A new man would have been of no use in preparing the statements, and the transfer of a clerk from the Prison Department was out of the question, as at that time all such clerks were busily engaged in connection with the tabulation of the figures for the Annual Jail Report.

2. The number of boys in the Reformatory on the last day of 1894 was 101. Thirty-three boys have been admitted during the year under report as against twenty-seven in the year previous. Of the total number, 134, confined during the year, 23 were released on expiry of sentence, four were released on appeal, and two* were released under the orders of Government, leaving on the last day of the year under report 105 boys in the Institution. The daily average strength during the year has been 101·8 as against 100·6 during 1894.

*Government Resolution, Judicial Department, No. 2649, dated 22nd April 1895.

Government Resolution, Judicial Department, No. 8927, dated 21st December 1895.

3. Of the 33 boys admitted during the year, eight had been previously convicted once, five twice, and one four times. These figures are not as satisfactory as those for the year 1894. The addition of three columns to this statement enables particulars to be furnished regarding the parents and guardians of the boys admitted. In some cases these columns have not been filled in, and the reason of the omission has been explained by the Superintendent.

4. The general behaviour of the boys has not been as satisfactory as in previous years, the percentage of punishments having risen from 33·7 in 1894 to, (including punishments awarded by Magistrates,) 44·2 in 1895. Nine boys were punished thrice, 16 twice, and 16 once. There have been four escapes, and one attempt at escape, during the year. The runaways were all recaptured.

5. Four of the 29 boys released during the year appear to be following the trades taught them in the Reformatory. One is a convict in the Karáchi Prison, one has again been confined in the Reformatory, and the particulars of the last four boys who have been released have not been furnished, as no enquiries regarding them have been made, owing to the fact that six months had not elapsed since the date of their release when the report was being written: (*vide* Rule 30 of the Reformatory Rules). The particulars regarding boys who have been released during the year

1895 have alone been furnished, and this appears to be in accordance with subparagraph 8 of paragraph 5 of Government of India's No. ^{8 (Jail)}₃₇₉₋₃₀₀, Home Department, dated 10th September 1895.

6. The decrease in the cash earnings of the boys under the reward system is no doubt due to the conduct of the boys not being up to the usual standard. One monitor was rewarded for preventing an escape by a grant of three months' remission of his sentence: Government Resolution, Judicial Department, No. 6254, dated 2nd September 1895.

7. There have been no deaths during the year. The number of admissions into hospital has exhibited a large increase on the numbers for the previous year, but the health of the boys on the whole has been satisfactory, as a reference to the weight test, the figures of which have been summarised by the Superintendent in paragraph 13 of his report, will show. Statement G now furnishes information as to girth of chest.

8. The garden results for 1895 exhibit a loss of Rs. 14-5-9, and to this must be added the expenditure incurred on the purchase of vegetables for provisioning the boys during three months, (April, May and June,) of the year. This result is not satisfactory, but it is only right to add that at times there is a scarcity of water which prevents the Superintendent making the most of the land at his disposal. Arrangements are being made to deepen the quarry from whence the supply of water for the garden is obtained, with a view to increasing the storage capacity of the same. Regarding the Factory operations, it will be observed from the statement marginally noted that there has been an increase of Rs. 417-10-2 in the profits over the figures of the year previous, and an increase of Rs. 744-3-1 over the figures for 1893, a result which shows that this branch of the Institution is being developed.

9. The table below shows the average earnings per boy and cost of maintenance for the past three years. Columns 5 and 7 show the average earnings per boy of those actually employed in the garden or factory. The figures in column 9 are arrived at by dividing the total earnings of the Institution by the total number of boys on its books:—

Year.	Daily average Number.	Daily average Sick.	GARDEN.		FACTORY.		Average cost of Maintenance.	Average Earnings per Boy.	Net cost to Government per Boy.	Remarks.
			Average number employed.	Earnings per Boy*.	Average number employed.	Earnings per Boy.				
				Rs. a. p.		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	
1893 ...	100·8	3·6	25	11 3 11	39	24 15 6	110 10 3	19 9 9	91 0 6	
1894 ...	100·6	3·6	27	Loss (a)	37	35 2 3	116 3 1	23 6 9	92 12 4	
1895 ...	101·8	5·5	27	Loss (b)	41	41 14 5	120 9 4	27 7 8	93 1 8	

* Includes cost of vegetables supplied to inmates.

(a) Rs. 45-12-6.

(b) Rs. 14-5-9.

10. The total expenditure during the year shows an increase of Rs. 586-6-6 over the figures for 1894. The increase under the head "Establishment" is ascribed to the more regular attendance of the artizans, and to this no objection can be raised. The water rates have increased by more than one-half, and in fact they are nearly double those for the year 1894. The development of the flower gardens, both inside and outside of the Reformatory has, together with the reasons advanced by the Superintendent, no doubt assisted to swell the expenditure under this item. The other variations in the expenditure have been explained by the Superintendent in his report.

11. I was unaware of the shortcomings of the clerk, to which the Superintendent draws attention in his paragraph 27, until actually perusing that passage, as the matter had not previously been brought to my notice. Indeed, I may say that some little time ago I selected the late clerk of this Reformatory for the post of Head Clerk to the Prison of Bijápur, an appointment in which he seems to be working satisfactorily.

12. The Assistant Deputy Educational Inspector has reported well on the working of the school, and has commented on the good work of the School Master. The latter has been granted (Government Resolution, Judicial Department, No. 7430, dated 24th October 1895) a personal allowance of Rs. 5 per mensem.

13. In his paragraph 14 the Superintendent speaks of there having been no material change in the buildings. This remark can only refer to the original buildings of the Institution, as the construction of the new quadrangle, to which the Superintendent refers in his paragraph 15, a measure by which the accommodation will be increased 25 per cent., constitutes a very material enlargement of the capacity of the Reformatory. During the whole of the past year, the Institution has been full and more than full, such of the boys,—ranging from five to eight in number,—as could not be given cubicular accommodation, having been accommodated at night in some of the Hospital wards which were available for the purpose. When the new quadrangle of the Reformatory is complete, the number of cubicles will be raised from 96 to 120. I anticipate that ere long the whole of the additional accommodation will be occupied. The new quadrangle now approaching completion has been so planned as to admit of the symmetrical arrangement of the buildings of the Institution,—an arrangement with which the present additions somewhat interfere,—being restored hereafter by an additional quadrangle, to balance, so to speak, that now approaching completion, being constructed on the other side of the main centre block. If hereafter the second quadrangle is to be constructed on the same scale as that which will shortly be occupied, the number of cubicles will be further raised to 144. The benefits arising from the addition of the present new quadrangle are not confined to those accruing from an enlargement of the sleeping and workshop accommodation of the Institution. There can, I think, be but little doubt that in the Reformatory, as originally planned, the zone of vacant ground between the buildings and the main walls was made far too narrow for appearance, and, I am disposed to add, for health. The addition of the new quadrangle has led to about half the enclosing wall, on one face of the main block of the Institution, being thrown back a considerable distance, a measure which must tend to increase the circulation of air in the immediate neighbourhood of the alterations in question.

I have the honour to be,

Sir,

Your most obedient Servant,

T. M. FILGATE,

Inspector-General of Prisons.

No. 215 of 1896.

From

THE SUPERINTENDENT, REFORMATORY SCHOOL,

Yerrowda ;

To

THE INSPECTOR-GENERAL OF PRISONS,

Bombay Presidency.

Reformatory School,

Yerrowda, 10th April 1896.

SIR,

I have the honour to submit the Annual Report on the working of the Reformatory School for the year 1895.

2. There were 101 boys present in the Institution at the beginning of the year 1895, 33 were admitted during the year under report against 27 in the previous year, thus making a total of 134 against 129 in the year 1894, or five more than in the preceding year. During the year under report, 23 were released on expiry of their sentences, four have been released on appeal, and two have

been released by order of Government, *vide* Government Resolutions, Judicial Department, Nos. 2649 and 8927, respectively, dated 22nd April 1895 and 21st December 1895. Thus there were 105 boys remaining in the Reformatory on the 31st December 1895 against 101 in the preceding year. The daily average strength in 1895 being 101·8 against 100·6 in the year 1894 (as per Statement A).

3. Statement B shows in detail the name, age, district from which received, nature of crime, sentence, Court by which convicted, and state of education on admission of every boy admitted during the past year, together with the value of the property stolen by the boys in cases of theft. In the year under report, under instructions from the Inspector-General of Prisons, three additional columns have been added to the statement, *i.e.*, are the parents and guardians of the boy alive, are the parents or guardians employed in trade or agriculture, are the parents or guardians able to support the boy. Information regarding the last three columns was asked for in every case, but out of 33 cases inquired into replies in 20 cases only have been received up to date.

4. The conduct of the boys during the year under report was far from satisfactory; the percentage of punishments having risen from 33·7 in the year 1894 to 44·2 during the year under report, while the daily average strength has only increased by 1·2.

5. A reference to Statement C will show the various offences committed, and the punishments inflicted.

6. It is to be regretted that four escapes occurred during the year under report, and a fifth boy succeeded in breaking out of his cubicle at night with the evident object of escaping. The first two escapes occurred on the early morning of the 21st January 1895, immediately after the opening of the Reformatory. The boys managed to elude the watch kept by the warders upon the Howd where they were performing their ablutions and got close to the north of the office, dragging a Tanga (which stood near the gate for delivery to the owner who had omitted to send for it the previous evening) a little nearer to the wall and with the assistance of the same scaled the wall. A third boy would have escaped, but for the timely alarm of a monitor preventing him. A certain clue was obtained from the boy who was caught of the two escaped boys, and two peons were sent in pursuit of these boys with certain instructions which they strictly observed and caught the boys with the assistance of two villagers near the village of Salarwadi, and brought them back to the Reformatory before evening. As no blame could be attached to any particular peon, no one was prosecuted. The boys were proceeded against under Section 224, Indian Penal Code, before the First Class Magistrate, Haveli, who sentenced each to 12 stripes. It is presumed no additional sentence was awarded, as the Magistrate thought it imprudent to send the boys to jail after their Reformatory sentence had expired.

7. A third escape occurred on the 29th April 1895, from the flower garden, while the boy was in charge of a monitor at about 12-30 noon, the boy had his cap upside down and was going towards the Kirkee road where he attracted the attention of a policeman near the FitzGerald Bridge, who questioned him and being dissatisfied with his answers recaptured him and brought him to the Superintendent at the Reformatory who only then ascertained that an escape from the flower garden had been effected, as up to that time no one in the garden knew that an escape had occurred. The monitor was reduced, and the boy on being prosecuted was convicted and sentenced to receive 18 strokes, nine on each hand. This boy was recaptured and brought to the Reformatory in less than an hour after his escape.

8. The fourth escape occurred from the garden through the neglect of two Head warders. The boy was permitted to cut Karbi by himself and thus managed to effect his escape. The discovery was made by a man who was grazing his bullocks near the prison seeing the boy pass. He mentioned the circumstance to a Jemadar of the Central Prison who finding his own prisoners all safe communicated to the Reformatory Head warders, when the escape was detected. The boy after his escape contrived to secure a situation under a Marvari the same day, and having committed a fresh theft within three days at the Marvari's place, ran away, but the Marvari succeeded in capturing the boy and

handing him over to the Police. The Police sent the boy on the 13th December 1895 to the Reformatory for a record of his previous convictions, the boy was identified as the one who had recently escaped. The boy was prosecuted by the Police for the theft from the Marvari, for which the Cantonment Magistrate, First Class, sentenced him to receive 18 stripes, after which the boy was sent back to the Reformatory to undergo his original sentence. The boy was next proceeded against under Section 224, Indian Penal Code, before the First Class Magistrate, Haveli, who sentenced him to six months' rigorous imprisonment in the Central Prison after the term of his confinement at the Reformatory expires. The two Head warders were also proceeded against under Section 223, Indian Penal Code, but the clerk who was entrusted with the prosecution appears to have been negligent in conducting the case, hence both the Head warders were acquitted by the Magistrate.

9. In 66 cases the reports of the various District authorities have been received (copies attached), regarding the characters and subsequent career of the boys released. It would appear from Statement D that out of the 29 boys released during the year under report, one was reconvicted and sent to Jail, and another brought back to the Reformatory school, i.e., two boys only have been reconvicted in the year 1895, against 3 in the preceding year.

Mark System.

10. The mark system has worked as described below. The number of boys who earned money during the year under report is 87 against 84 in the preceding year. The amount earned being Rupees 211-6-0, against Rs. 219-0-6 in the year 1894. Out of the above sum Rs. 20-12-0 was expended in sweetmeats against Rs. 19-1-0 in the preceding year. Rs. 143-1-2 was paid to released boys against Rs. 164-10-2 and Rs. 190-10-0 paid into the Savings Bank to the credit of the boys, against Rs. 199-15-6 in the year 1894.

Sanitary.

11. The sanitary arrangements are complete. The year, on the whole, has been a healthy one, although the number of admissions into Hospital, and the daily average of sick, were both considerably higher than in the preceding year. The cases treated for ague alone being 168 as against 65 in the year 1894. This seems to me to be too high, especially when it is noted that the conduct of the boys was far from satisfactory in the year under report. There is a strong suspicion that some of the boys have been malingering.

12. It is satisfactory to note that there has been no death this year against one in the preceding year. Statement E shows the details of admission into Hospital, &c.

Weight test.

13. The results obtained under this head are very satisfactory. Statement G shows weights on admissions, age, employment outside, caste, work on

1894.		1895.	
Boys gained—	Lbs.	Boys gained—	Lbs.
22	above 10	32	above 10
42	5 to 10	43	5 to 10
27	$\frac{1}{2}$ to 5	27	$\frac{1}{2}$ to 5
91 Total gained.		102 Total gained.	
2 Stationary.		1 Stationary.	
Lost—		Lost—	
8	$\frac{1}{2}$ to 5	2	2 to 3 $\frac{1}{2}$
101 Total number.		105 Total number.	

which employed in the Reformatory and weight, on 31st December 1895, &c., &c. The statement is just the same as that submitted last year excepting a column of chest measurements added to it in the new form. It will be observed at a glance that the figures given in the margin show favourably when compared with those of the preceding year. 102 gained in the year under report against 91 in the previous year, two boys have lost against eight in the year 1894 and one remained stationary against two in the preceding year. Out of the two boys who have lost in weight, one was treated for carbuncle and the other for gum-boil. Out of 84 boys measured, four boys have increased in height by $\frac{1}{4}$ ", thirteen boys by $\frac{1}{2}$ ", six boys by $\frac{3}{4}$ ", seven boys by 1", six boys by $1\frac{1}{4}$ ", nine boys by $1\frac{1}{2}$ ", seven boys by $1\frac{3}{4}$ ", three boys

by 2", three boys by 2 $\frac{1}{4}$ ", ten boys by 2 $\frac{1}{2}$ ", three boys by 2 $\frac{3}{4}$ ", two boys by 3", two boys by 3 $\frac{3}{4}$ " and two boys by 4 $\frac{1}{4}$ ", and seven have remained stationary.

Building.

14. There has been no material change in the buildings. The galvanized gutters of the remaining four roofs of the cells mentioned in my last report was taken in hand and completed by the Public Works Department, in addition to the undermentioned works:—

	Rs.
1. Iron sheets to 12 of the cell doors at a cost of	20
2. Moveable weather boards to Hospital latrines at a cost of	45
3. Iron bar across the bathing platform to support the boys when washing and stamping their clothes... ..	38
4. Constructing two hearths with chimnies in blacksmith's shop costing	131
5. Cement painting to eight blocks of cells	156

15. The work of the new quadrangle was started by the Public Works Department in the beginning of last September, and it is expected that the same will be completed by the end of May 1896, when additional accommodation for 24 boys, and a laundry house will be available for the Reformatory.

Diet.

16. There has been no change in the diet scale as it is considered sufficient in quantity and good in quality. At the recommendation of Brigade-Surgeon Lieutenant-Colonel Salaman, the Inspector-General of Prisons was pleased to sanction the substitution of Besun (a preparation of gram dall) once a week instead of Tur dall, as a change from middle of October 1895.

Clothing.

17. There has been no change in the clothing of the boys, it is sufficient in quantity and good in quality.

Manufactures.

18. The trades taught in the Reformatory are precisely the same as those carried on in the previous year, *i.e.*, carpentry, blacksmiths' work, painting, tailoring, book-binding, rattaning, chairs and French Polishing. The factory operations have shown better results in the year under report than in any of the preceding years, a net profit of Rs. 1,718-0-6 having been secured, as against Rs. 1,300-4-4; or Rs. 417-12-2 more than in the year 1894, the profit per boy having risen in consequence to Rs. 41-14-5 against Rs. 35-2-3 or Rs. 6-12-2 more per boy a most satisfactory result. The nominal value of labour for boys employed in manufacturing articles for the various jails and for the Reformatory fell from Rs. 165-8-0 to Rs. 139-11-0 in the year under report. This slight fall of Rs. 25-13-0, when compared with the preceding year, is solely due to less demands from the jails and Reformatory during that period.

Laundry.

19. The laundry, which was temporarily closed, has been re-started in the beginning of the year but for a very short time, the raw materials expended in it amounted to Rs. 16-13-7; the profit being Rs. 29-9-0. It is now hoped that this industry will turn out to be the best paying one when it has been once well established, and becomes known.

Garden.

20. The area of ground under cultivation is just the same now as in the previous year. The cash realizations from garden produce shows a loss of Rs. 14-5-9 against Rs. 45-12-6 in the preceding year. The value of vegetables supplied during the year under report for provisioning the boys was Rs. 164-11-9 against Rs. 244-6-5. This shows a nominal loss of Rs. 79-10-8 as the vegetables are charged in the bill at the contract rates. The contract rates for the year under report were more favourable than in the preceding year, *i.e.*, 55 lbs. for the year under report against 45 lbs. in the preceding year, hence the difference. The flower gardens both inside and outside the Reformatory are kept in good order.

Maintenance.

21. There has been an increase in the item of fixed establishment by Rs. 112-9-2, this is owing to more regular attendance on the part of artisans in the year under report than in the preceding year, as every case of absence without leave is deducted from their pay. A reference to the factory statement will bear out this fact. The Hospital Assistant drew his allowance for the first time in the year under report.

22. There has been a falling off of Rs. 27-0-9 under the head of rations, which is entirely due to more favourable contract rates in 1895 than in 1894.

23. There has been an increase of Rs. 227-10-10 in Hospital charges. This can easily be seen by the increase of 108 admissions in the year under report when compared with the preceding year.

24. The slight increases under clothing and bedding need no explanation, as the rates of raw materials fluctuate. The cloth is manufactured in the Yerrowda Prison for the Reformatory School.

25. Under the head contingencies there is an increase of Rs. 206-12-8 in the item of water rates. Every endeavour has been made to check any undue waste of water : and steps were taken to ascertain the causes of the increase which I presume was owing to meters more correctly registering the consumption of water being introduced in places of old ones this increase it is believed took place in every institution. In consultation with the Executive Engineer for Irrigation a Departmental meter was sent from the Ahmedabad Prison and the same has been substituted for that of the Irrigation Department.

26. There has been a slight increase in lighting charges it being Rs. 84-15-0 in the year under report against Rs. 71-4-0 in the preceding year. There has been a saving of Rs. 46-13-10 under the other charges. It should be noted that every possible care has been taken to put every item of controllable charge as low as possible, consistent with good management. The increase in the two items, *i.e.*, Hospital charges and water rates, however, amounted to Rs. 467-10-4.

Establishment.

27. The clerk has been very careless during the latter part of the year under report. Both the School Masters have been reported as good teachers, especial mention being made of the Senior Master Mr. V. J. Gore. The school was examined by the 1st Assistant Deputy Educational Inspector, Poona subdivision, on the 17th August 1895, who seems to have been much pleased with the excellent result obtained. The examination report is hereto attached.

28. The Chief Head warder Balkrishna Piraji has shown great incompetence. He was suspended on the 8th April 1895 for absenting himself without leave, &c. He was, however, reinstated by order of the Inspector-General of Prisons pending inquiry into his case, but was again suspended for gross disobedience of the orders of the Inspector-General of Prisons, and after full enquiry had been made into his case, the Inspector-General reduced him to Rs. 12 a month and transferred him to the Yerrowda Prison. An ex-soldier of the Bombay Sappers and Miners has been appointed in his place. At present owing chiefly to inexperience, he is at times very nervous about his work, but it is hoped as time goes on and he becomes familiarised with it he will prove himself efficient.

29. In the month of June 1895, Head warder Ramprasad was invalided and a Head warder named Mahamad Khan Lal Khan was appointed in his stead. Though a good Head warder he is too much mixed up with the boys, and is not a reliable man. The Head warder Hasham Esmail was removed from the book-binding work as he intentionally used to delay work under one or other pretext. The boys seem quite capable of doing the work independently of him. He was twice fined for neglect of duty. Three peons were fined and one dismissed for similar reasons.

30. There has been no change in the artizans and a slight improvement in their conduct has taken place. The carpenter and painter were fined a day's pay each for being absent without leave. The former, as a rule, is always far too fond of long holidays.

General Remarks.

31. His Excellency the Governor visited the Reformatory School on the 1st July 1895.

32. The games, &c., are just the same as defined in paragraph 28 of the last year's report, *i.e.*, cricket, football. The boys get their turn in gardening, and are regularly taken out for a walk in the mornings for two days during the week; and twice a week they play at football and cricket. They have also been exercised in the gymnasium as usual. The only difference being that they have not been sent out to witness the football and cricket matches, and to see the races as was done in the preceding year. This was entirely on account of their general bad behaviour. They were, however, allowed to witness the cross-country races which took place near the Reformatory.

33. In conclusion, I desire again to express my gratitude to the officers, both Civil and Military of Poona and Kirkee, who have kindly patronised the various branches of industry carried on in this school. The coach factory has established a reputation for itself, and obtains a good supply of work not only from Poona and neighbourhood but from the Mofussil also.

I have the honour to be,

Sir,

Your most obedient Servant,

FRAMJI COWASJI B.,

Superintendent, Reformatory School.

Endorsement No. 314, dated 8th May 1896, from the Superintendent of the Reformatory School, Yerrowda.

No remarks were made by the Visitors to whom this report was circulated.

(Signed) FRAMJI COWASJI B.,
Superintendent, Reformatory School.

Name of each Teacher.	Completed service in				Salary including Allowances.		Standard taught.		Remarks regarding each teacher.		
	The Depart-ment.	This School.	Years.	Mths.	Rs.						
Master Mr. Vishnu Janardan Gore	10	...	10	...	25		II, III & IV.		A good teacher.		
Assistant Govind Balkrishna	3	4	3	4	15		I & Infants.		Do.		
General Remarks and recommendation by the Inspecting Officer.	A good school. I was much pleased with some of the boys who acquitted themselves very creditably. The master Mr. Gore is a hard-working teacher and deserves some encouragement. Last year also his work was found good and he was recommended for promotion.										

Date of last inspection.—21st August 1894.
and by whom inspected.—2nd Assistant Deputy, Poona.

Date of the foundation of the School.—3rd September 1870.

Annual and Periodical Reports.

Yeraoda Juvenile Reformatory School.
Review of the Report for the year 1895.

No. 5151.

JUDICIAL DEPARTMENT.

Bombay Castle, 28th July 1896.

Letter from the Inspector-General of Prisons, No. 2762, dated the 18th May 1896—Forwarding two printed copies of the Administration Report of the Yeraoda Juvenile Reformatory School for the year ending 31st December 1895, together with his remarks thereon recorded in letter No. 2670, dated the 12th May 1896.

RESOLUTION.—During the year under review there were 33 fresh admissions into the Reformatory against 27 in 1894. The total number of boys confined in 1895 was 134, of whom 29 were released, leaving 105 on the rolls at the close of the year, as compared with 101 at the end of 1894.

2. The general behaviour of the boys was not as satisfactory as in the previous two years, the percentage of punishments having risen from 36·7 in 1893 and 33·7 in 1894 to 44·2 in the year under report. There were four escapes and one attempt at escape, but all the runaways were recaptured and appropriately punished.

3. In accordance with the orders of Government, Statement D has been modified and now gives particulars regarding the boys who were released during the year only. The statement shows that of the 29 boys so released, 13 are following honest employments, 4 are residing with their parents or guardians, 1 has gone up-country, 1 has been sent to jail, 1 has been recommitted to the Reformatory, 1 died, of 4 nothing is known, and regarding the remaining 4 no enquiry has yet been made. Only 4 of the thirteen boys reported to be engaged in honest employment appear to be following the trades taught them at the Reformatory.

4. Under the Mark System 87 boys, as against 84 in 1894, earned marks entitling them to rewards in money; but there has been a decrease in the total amount of the earnings from Rs. 219-0-6 to Rs. 211-6-0. The amount, however, saved by the boys was almost the same as in the previous year, the figures for 1894 and 1895 being Rs. 199-15-6 and Rs. 190-10-0 respectively.

5. There was a considerable increase in the number of admissions into hospital, which rose from 134 in 1894 to 242 in the year under report, the increase being due chiefly to the large number of ague cases. The daily average number of patients also increased from 3·6 to 5·5. Neither the Superintendent nor the Inspector-General appears, however, to regard the health of the boys as having been really worse than in the previous year and their view is borne out by a reference to the weight test. The Superintendent considers that the real cause of the apparent increase in sickness was malingering.

6. The results of the application of the weight test are tabulated in Statement G, to which has been added a column showing chest measurement. They compare favourably with those of 1894. Out of the 105 boys in the Institution, 102 gained in weight, 2 lost in weight and the weight of one boy remained stationary, while in the preceding year out of 101 boys, 91 only gained in weight, 8 lost in weight, and the weight of 2 boys remained the same.

7. There was a further advance during the year in the factory receipts, which amounted to Rs. 1,718-0-6 as against Rs. 1,300-4-4 in 1894, and there was consequently a satisfactory increase of Rs. 6-12-2 in the profit per boy over

the rate in 1894. On the other hand, the receipts from garden produce again fell and were Rs. 14-5-9 less than in the previous year. This is attributed to a scarcity of water, but it is stated that attempts are being made to improve the supply. Statement H shows an increase under every head of expenditure except "Rations," the cost of which fell slightly owing to more favourable contract rates. The increase under the head "Hospital Charges" is sufficiently explained by the larger number of admissions into Hospital during the year, and that under "Contingencies" is mainly accounted for by the increase in water-rates which the Superintendent attributes to the use of new meters which register the consumption of water more correctly than was formerly possible.

8. On the whole the working of the Institution appears to have been satisfactory.

9. Copies of the Report and of this Resolution should be distributed as usual.
